Nebiyu Habtemariam

Kirksville, MO | nebabtew@gmail.com | (651) 432-2949 | LinkedIn | GitHub

EDUCATION

Truman State University Kirksville, MO
B.S. in Data Science, Business. Presidential Scholar. GPA: 3.7. *Expected May 2028*
Relevant Coursework: Statistical Methods, Machine Learning, Database Systems (SQL), Data Ethics, Neural Networks, Data Structures & Algorithms

SKILLS

Data Engineering: SQL (MySQL), Python (Pandas, NumPy), ETL pipelines, data transformation, schema design, relational modeling
Analytics & Modeling: scikit-learn, XGBoost, Random Forest, GridSearchCV, logistic and linear regression, panel logit/probit, A/B testing, AUC, R^2, MAE
Dashboards & Reporting: Tableau, Power BI, Excel, Streamlit, Plotly
AI & Unstructured Data: LLM summarization and classification (Gemini, OpenAI, Anthropic APIs), Pydantic structured output, RAG, LangChain
Tools: Git/GitHub, Jupyter, Google Colab, RStudio

EXPERIENCE

Undergraduate Research Assistant, Dr. Jie Li Sept 2026 – Present
Truman State University *Kirksville, MO*
- Building an original panel dataset by merging Bloomberg SPLC supply chain data with deal-level VC, M&A, JV, and PE transactions
- Defining a coding scheme (Foundational AI vs. Applied) to classify every deal consistently across U.S. and Chinese firms
- Designing a panel logit/probit model to test how external pressure shifts firm investment decisions since 2018

Break Through Tech Fellow, team of 6 Aug 2026 – Present
Break Through Tech AI Studio (Cornell Tech), host: Anote AI
- Building an agentic framework that evaluates AI coding assistants with rubric-based LLM judging, benchmarked against a zero-shot baseline

Digital Marketing Analyst May 2024 – Aug 2024
SAT & Co. *Dubai, UAE*
- Developed and maintained Tableau dashboards tracking KPIs across web, email, and social channels for leadership reporting
- Designed and analyzed simultaneous A/B tests on social content, achieving a 200% increase in reach
- Ran a full SEO audit with SEMrush and Google Search Console, driving a 30% increase in website traffic

Content Analyst Intern Aug 2023 – Oct 2023
D!NK TV *Addis Ababa, Ethiopia*
- Consolidated raw data from 4 platforms (YouTube, TikTok, Meta, Google Analytics) into unified Tableau and Excel dashboards delivered weekly to production and leadership
- Ran A/B tests on formats, timing, and captions; recommendations drove a 25% improvement in engagement rates

PROJECTS

Insurance Claim Predictor https://github.com/nebabtew/Insurance-claim-predictor Dec 2025
Python, scikit-learn, XGBoost, Streamlit
- Compared 5 models tuned in GridSearchCV on 1,332 records; XGBoost led with R^2 0.82 and MAE $3,672 on a held-out test set
- Used EDA to identify the strongest drivers (smoker status, blood pressure) before modeling
- Shipped a Streamlit app with input validation and fixed train/serve feature mismatches

MirrorMetrics https://github.com/nebabtew/mirrormetrics March 2026
Python, Gemini API, Pydantic, Streamlit
- Built an LLM pipeline that processes unstructured TikTok comments into structured insights: sentiment and emotion mapping, subgroup detection, demographic profiling, and intent scoring
- Engineered reliable structured output with 8 nested Pydantic models, a 3-attempt retry loop, and a 4-layer JSON parsing fallback

VibeFinder 2.0 https://github.com/nebabtew/vibefinder-rag Jan 2026
Python, Gemini API, scikit-learn, Streamlit
- Built a RAG pipeline with a deterministic guardrail that checks LLM summaries against source documents; caught fabricated claims and dropped confidence from 1.00 to 0.20 (CodePath AI110 HONORS)

CERTIFICATIONS

- Cornell University, Machine Learning Foundations (Break Through Tech AI Fellow, selected from 4,300+ applicants), May 2026
- CodePath AI110 Foundations of AI Engineering (HONORS), May 2026
